

KING'S COLLEGE

WILKES-BARRE, PENNSYLVANIA

Clinical Laboratory Science/ Medical Technology

Don't you just hate getting sick? It sneaks up on you with a little sneeze and suddenly grows into a full blown cold and swollen glands the size of golf balls. Next thing you know, you find yourself on the examining table in your doctor's office having your throat swabbed to see if you have strep throat. Luckily for you, the test came back negative. And even luckier for you the hospital's medical technologist was available to run all of the necessary lab tests to get you the results you needed.

Clinical Laboratory Science/ Medical Technology at King's

As illustrated in the example above, medical technologists perform tests to determine what types of illnesses people may have, but their role in patient care does not end there. As a clinical laboratory science/medical technology major you will learn how to study and analyze various types of body fluids and tissue samples assisting doctors in their diagnoses. Just a sample of the types of tests medical technologists perform include complete blood counts, comprehensive metabolic panels, liver function tests, electrolyte panels, urinalysis, lipid profiles, renal function tests and routine cultures just to name a few.

Education and Experience

While some schools may provide you with a basic skill set, King's clinical laboratory science/medical technology majors acquire a well-rounded education. After you complete three years of core and science courses, you will have your transcripts evaluated by the National Accrediting Agency for Clinical Laboratory Sciences. Upon their approval, you will seek out a 12-month hospital-based clinical rotation approved by the American Society of Clinical Pathologists (ASCP) during which you will gain experience.

Job and Graduate School Placement

Many people who have earned a degree in clinical laboratory science/medical technology at King's have flourished in the workforce or graduate school. Here are some examples of where our alumni have found success.

- Drexel University, Master of Medical Science
- University of Virginia, graduate studies in physician assistant
- Hazleton General Hospital, medical technologist
